

Fact and Fiction

Get Up!

What do we know about  ?

- All plants and animals need food for energy.
- Most living things are food for other living things. This is called a food chain.
- The grasshopper eats plants. Then amphibians and other animals eat grasshoppers.
- Larger animals eat amphibians and small mammals. Apex predators are the top of the chain.

What do we know about  ?

- Jet needs to be fed.
- Jet gets food from Meg.
- Jet likes to cuddle in bed with Meg.

How are  and  the same?

- All animals need food.
- Many insects and animals can feed themselves. Other animals, like Jet, need people to feed them.
